

**The Faculty of Medicine of Harvard University
Curriculum Vitae**

Date Prepared: July 9th, 2021
Name: Xiang Li
Office Address: 25 New Chardon St. 449A, Boston, MA, 02104
Home Address: 5 Cabot Rd, Medford, MA, 02155
Work Phone: 706-248-0264
Work Email: xli60@mgh.harvard.edu
Place of Birth: China

Education:

09/2006	B.E.	Automation	Shanghai Jiaotong University, China
09/2009	Research Assistant	Data modeling and scientific software platform development	Nankai University, China
06/2016	PhD	Computer Science, Distinguished Prof. Tianming Liu	University of Georgia

Postdoctoral Training:

07/2019	Research Fellow	Medical Image Analysis, Assoc. Prof. Quanzheng Li and Distinguished Prof. James H. Thrall	Harvard Medical School and Massachusetts General Hospital
---------	-----------------	---	---

Faculty Academic Appointments:

08/2019	Instructor	Radiology	Harvard Medical School
---------	------------	-----------	------------------------

Appointments at Hospitals/Affiliated Institutions:

08/2019	Instructor	Radiology	Massachusetts General Hospital
---------	------------	-----------	--------------------------------

Major Administrative Leadership Positions:

International

2019	Organizer and program chair for the International Workshop on Multiscale Multimodal Medical Imaging	The Medical Image Computing and Computer Assisted Intervention Society
2021	Organizer and program chair for the International Workshop of Multimodal Learning and Fusion Across Scales for Clinical Decision Support	The Medical Image Computing and Computer Assisted Intervention Society

Committee Service:

International

2015	Program Committee	MICCAI Workshop on Machine Learning in Medical Imaging (MLMI)
2017	Program Committee	International Conference on Brain Informatics
2019	Program Committee	Machine Learning in Computational Biology
2019	Program Committee	NeurIPS Workshop on Machine Learning in Computational Biology
2019, 2021	Program Committee	ACM SIGKDD Workshop on Mining and Learning from Time Series (MILETS)

Professional Societies:

2011-	Institute of Electrical and Electronics Engineers (IEEE), International	Member
2011-	Engineering in Medicine and Biology Society (EMBS), International	Member
2011-	The Medical Image Computing and Computer Assisted Intervention Society, International	Member
2017-	American Roentgen Ray Society (ARRS), Regional	Member

Editorial Activities:

• Ad hoc Reviewer

Annals of Translational Medicine

Artificial Intelligence in Medicine

BMC Bioinformatics

Computer Methods and Programs in Biomedicine

Computer Methods in Biomechanics and Biomedical Engineering

European Radiology

Frontiers in Aging Neuroscience
 Frontiers in Computational Neuroscience
 Frontiers in Genetics
 Frontiers in Human Neuroscience
 Frontiers in Neuroscience
 Frontiers in Oncology
 Human Molecular Genetics
 IEEE/ACM Transactions on Computational Biology and Bioinformatics
 IEEE Access
 IEEE Journal of Biomedical and Health Informatics
 IEEE Open Journal of the Computer Society
 IEEE Sensors Journal
 IEEE Transactions on Affective Computing
 IEEE Transactions on Biomedical Engineering
 IEEE Transactions on Cognitive and Developmental Systems
 IEEE Transactions on Fuzzy Systems
 IEEE Transactions on Medical Imaging
 JAMA Network Open
 Journal of Electronic Imaging
 Medical Image Analysis
 Microscopy Research and Technique
 Neuroimage
 Neurocomputing
 Pattern Recognition
 Physical Communication
 Progress in Neurobiology

• **Other Editorial Roles**

2018-	Editorial Board	Journal of Healthcare Engineering
2019-	Advisory Board	Current Medical Imaging
2019	Editor	Proceeding of the first international workshop on Multiscale Multimodal Medical Imaging, MMMI 2019
2021-	Editorial Board	Electronics
2021-	Associate Editor	Frontiers in Radiology

2021-	Editorial Board	Frontiers in Oncology
2021-	Editorial Board	Frontiers in Computational Neuroscience

Honors and Prizes:

2015	Paul D. Coverdell Neuroimaging Franklin Foundation Scholars Program Travel Award	Department of Psychology, University of Georgia
2016	Outstanding Graduate Dissertation/Thesis	University of Georgia
2020	Best Paper Awards	IEEE International Symposium on Biomedical Imaging

Report of Funded and Unfunded Projects

Past

08/01/2013- 07/31/2018	“Exploring Functional Interactions between Gyri and Sulci” National Science Foundation (NSF), Standard Grant #1263524 Graduate student (research assistant) (PI: Tianming Liu) Investigation of functional architectures of gyri and sulci in human brain, in order to lay down solid foundations for brain disorders studies.
09/01/2013- 05/31/2016	“Assessing Large-scale Brain Connectivities in Mild Cognitive Impairment” National Institute of Health (NIH), Research Project (R01) #R01AG042599 Graduate student (research assistant) (PI: Tianming Liu) Establishment of a fine granularity next-generation brain atlas for studying of brain imaging that rely on accurate functional/structural localizations. The atlas is employed to assess large-scale brain network alterations in MCI/AD patients.
11/01/2014- 10/31/2018	“Reciprocal Organizational Architecture of Human Brain Function” National Science Foundation (NSF), Standard Grant #1439051 Graduate student (research assistant) (PI: Tianming Liu) Development of novel computational methods to investigate how different brain regions form distinctive networks. The model is used to develop and evaluate a novel theory of reciprocal organizational architecture to explain human brain function.
2016-2018	“Post-Doctoral Scholar in Artificial Intelligence and Image Analysis” Department of Radiology, Massachusetts General Hospital Research fellow in training (PI: James Thrall) Investigation of medical image analysis solutions to address practical challenges in radiology, including overcoming insufficient data samples for deep learning analysis, fusion multiple imaging modalities, and development of prescreening protocols to be used in clinical flow. Training in radiology especially chest imaging, image analysis, and artificial intelligence methodologies.

Current

9/21/2020- “Pseudo Chest CT from Chest X-RAY, COVID-19 Workstream”
 03/01/2021 GE Precision Healthcare, Industrial Grant
 Project Leader (PI: Quanzheng Li)
 Development of a machine learning model that is able to generate pseudo CT from X-rays images for the purpose of improved diagnosis and management of patients with COVID-19. The model will be applicable to COVID-19 patients and will synthesize pseudo chest compute tomography (CT) images from a chest X-ray in COVID-19.

Projects Submitted for Funding

02/05/2019 “Identification and characterization of Alzheimer’s disease subtypes using structural, functional, and neuropathological brain networks”
 Co-Investigator (PI: Quanzheng Li)
 Investigation of possible AD subtypes through computational modeling. The model uses combination of information describing brain atrophy, functional network organization, AD pathology and neuropsychological assessment as input and employs a graph embedding approach to perform multi-modal data fusion and subtype discovery.

10/05/2019 “A deep learning-based MEG/EEG biomarker integrated with physiological information for early detection and monitoring of Alzheimer's disease”
 Senior/Key Person (PI: Quanzheng Li)
 Multimodal, deep learning-based integration of macroscale MEG/EEG brain networks with microscale PET amyloid- β and tau proteinopathy networks, for identifying structural-functional AD biomarkers. Percentile: 55

03/05/2020 “Deep Learning Based Phenotyping and Treatment Optimization of Heart Failure with Preserved Ejection Fraction”
 Senior/Key Person (PI: Quanzheng Li)
 Development of a multi-modal deep learning model on combined imaging and EHR data, for the purpose of holistic HFpEF patient portrayal, disease phenotyping, as well as treatment optimization. SRG Action: Impact Score:44 Percentile:35

Report of Local Teaching and Training

Teaching of Students in Courses:

2014-2015	CSCI 4850/6850: “Biomedical Image Analysis” Graduate and undergraduate students	University of Georgia 2-hrs session per week for 2 weeks
2015	CSCI 8850: “Advanced Biomedical Image Analysis” Graduate students	University of Georgia 3-hrs session per week for 1 week
2016	CSCI 8360: “Data Science Practicum” Graduate students	University of Georgia 3-hrs session per week for 1 week

Other Mentored Trainees and Faculty:

2018-2019 Xuandong Zhao, undergraduate student, Zhejiang University
 Visiting student at MGH. Mentoring role: research advisor. Accomplishments:
 Development of the Deep Voxel-Graph Convolution Network (DVGCN) model and presented at 2019 IEEE International Symposium on Biomedical Imaging (ISBI).
 Currently graduate student at UC Santa Barbara.

2018-2019 Weichen Wu, undergraduate student, Peking University

- Visiting student at MGH. Mentoring role: research advisor. Accomplishments: Participated in the DeepProjection project. Currently graduate student at Carnegie Mellon University.
- 2018-2019 Jiaming Guo, undergraduate student, Peking University
Visiting student at MGH. Mentoring role: research advisor. Accomplishments: Development of the graph-based modeling for MCI/AD progression (PETNet) and presented at 2019 IEEE International Conference on Big Data. Currently graduate student at University of California, Los Angeles.
- 2019- Haixing Dai, PhD student, University of Georgia
Graduate research intern at MGH. Mentoring role: research advisor. Currently supervising the research on the development of new models for analyzing brain functional networks from MEG data and brain-computer interface.
- 2019- Peiting You, PhD student, Peking University
Graduate research intern at MGH. Mentoring role: research advisor. Currently supervising the researching on brain structural connectivity analysis from DWI data through graph theory and deep learning algorithms.
- 2020-2021 Shan Lin, PhD student, University of Washington
Research intern at MGH as her curricular practical training (CPT). Mentoring role: research advisor. Currently supervising the research on surgical image analysis.

Local Invited Presentations:

- 2014 “Interactive and Automatic Cell/Synapse Detection by Exemplar Learning and Propagation”
Allen Institute for Brain Science, Seattle, WA.
- 2014 “Introduction to Vaa3D: an open-source platform for 3D visualization-assisted analysis on large-scale bioimages”
The Georgia Advanced Computing Resource Center (GACRC), Athens, GA
- 2014 “Dictionary Learning in Functional Brain Imaging”
Network of Greater Georgia Institutions for Neuroimaging and Statistics (NOGGINS) workshop, Athens, GA.
- 2015 “Investigation of Alternated Functional Dynamics in Autism fMRI Data”
Department of Biomedical Engineering, Emory University, Atlanta, GA.
- 2015 “Introduction to Functional Brain Imaging”
Department of Statistics, University of Georgia, Athens, GA
- 2016 “Brain Imaging and Functional Network Dynamics”
Computational Medicine and Bioinformatics in the Medical School, University of Michigan, Ann Arbor, MI.
- 2016 “Scalable Fast Rank-1 Dictionary Learning for fMRI Big Data Analysis”
Society for Industrial and Applied Mathematics, Southeastern Atlantic Section Conference (SIAM-SEAS), Athens, GA.

Report of Regional, National and International Invited Teaching and Presentations

☒ *No presentations below were sponsored by 3rd parties/outside entities*

Regional

2015 “Dynamic Functional Connectivity Analysis on 512-Channel LFP long recording data”
Brain and Behavior Discovery Institute, Medical College of Georgia, Augusta, GA.

National

2017 “Towards Practical Problems in Deep Learning for Radiology Image Analysis”
Nvidia GPU Technology Conference, San Jose, CA.

2018 Deep Learning Algorithm for rapid automatic detection of pneumothorax on chest CT
(selected oral abstract)
Annual Meeting of American Roentgen Ray Society, Washington, D.C.

2019 “Personalized Healthcare for Heart Failure with Preserved Ejection Fraction (HFpEF):
Diagnosis, Phenotyping and Treatment Optimization with Imaging and EHR Data”
Department of Statistics, University of Georgia, Athens, GA.

International

2011 Brain state change detection via fiber-centered functional connectivity analysis (selected
oral full-length paper)
IEEE International Symposium on Biomedical Imaging, Chicago, IL.

2013 Discovering common functional connectomics signatures (selected oral full-length paper)
IEEE International Symposium on Biomedical Imaging, San Francisco, CA.

2014 Dynamic network partition via Bayesian connectivity bi-partition change point model
(selected oral full-length paper)
IEEE International Symposium on Biomedical Imaging, Beijing, China.

2016 Big Data Strategies on Neuroimaging Analysis: Challenge in Data Availability and
Computation (invited talk)
International Conference on Brain Informatics and Health, Omaha, NE.

2017 “Opportunities, Challenges and Solutions for Artificial Intelligence in Medical Data
Processing”
Center for Data Science in Health and Medicine, Peking University, Beijing, China.

2019 “Towards Holistic Machine Intelligence in Healthcare Research and Clinical Practice”
School of biomedical engineering, Shanghai Jiaotong University, Shanghai, China.

2019 “Large-Scale Spatial-Temporal Modeling”
Chinese Center for Disease Control and Prevention, Beijing, China.

2019 Automated Segmentation of Cervical Nuclei in Pap Smear Images using Deformable
Multi-path Ensemble Model (selected oral full-length paper)
IEEE International Symposium on Biomedical Imaging, Venice, Italy.

2019 “Holistic Brain Representation for Discovery Science in Neuroimaging”
Workshop on Computational Medical Imaging and Artificial Intelligence, Zhejiang
University of Technology, China.

Report of Technological and Other Scientific Innovations

Automatic pre-screening method for	Development of a software system for the automatic detection of pneumothorax from CT images. The system has been validated internally by multiple
------------------------------------	---

pneumothorax detection, 2017	radiologists. The innovation is filed as Invention Disclosure to Partners HealthCare in 2017.
Inference of 3D chest CT images from 2D chest radiographs, 2019	Development of an invention to directly infer 3D chest CT images from 2D radiographs. The technique learns the mapping between the 2D image and the 3D spatial structure information of the corresponding CT image from the teaching dataset to thus achieving trans-dimensional 2D-3D mapping. The innovation is filed as Invention Disclosure to Partners HealthCare in 2020. It is currently filing for the patent application.
COVID-19 risk score prediction system and its integration into clinical workflow, 2020	Development of a risk assessment model for COVID-19 based on deep learning-based analysis of EHR and chest radiography data. Facilitating deployment and integration of the model into clinical workflow. The system is currently under internal, pseudo-online testing.

Report of Scholarship

Peer-Reviewed Scholarship in print or other media:

Research Investigations *indicates co-first authorship, **indicates my mentee

Thesis:

Title: **Machine Learning Approaches towards Holistic Brain Functional Space Discovery from fMRI Big Data**

by Xiang Li Ph.D., University of Georgia, August 2016

Advisor: Distinguished Prof. Tianming Liu

School: University of Georgia, Department of Computer Science

Source Type: Ph. D.

Subjects: Neuroimaging,

Citation (including journal papers in the thesis): >1000
